Markdown Style Guide

This is a demo of all styled elements in Jekyll Now.

[View the markdown used to create this post.](#)

This is a paragraph, it's surrounded by whitespace. Next up are some headers, they're heavily influenced by GitHub's markdown style.

Header 2 (H1 is reserved for post titles)

Header 3

Header 4

A link to [Jekyll Now](#). A big ass literal link <http://github.com/barryclark/jekyll-now/>

An image, located within /images

- A bulleted list
- alternative syntax 1
- alternative syntax 2
 - an indented list item

1. An
2. ordered
3. list

Inline markup styles:

- *italics*
- **bold**
- `code()`

Blockquote > Nested Blockquote

Syntax highlighting can be used by wrapping your code in a liquid tag like so:

```
{% highlight javascript %}
```

```
/* Some pointless Javascript */ var rawr = ["r", "a", "w", "r"]; {% endhighlight %}
```

creates...

```
/* Some pointless Javascript */  
var rawr = ["r", "a", "w", "r"];
```

Use two trailing spaces
on the right
to create linebreak tags

Finally, horizontal lines
